

Old metric/name	Current status	New metric/name	Meaning
mean_booking_delay	Kept only as backward-compatible alias	mean_accepted_booking_delay	Average delay among patients who accepted/booked a slot.
none	New	mean_offered_booking_delay	Average offered delay among patients who received a slot offer, including those who balked.
none	New	offered	booked + balked; excludes no_offer.
overall_scheduled_utilization	Removed/deprecated	Not part of final metrics	Old metric counted booked slots, including no-shows.
overall_attended_utilization	Removed/deprecated	average_utilization	Average daily utilization based on served patients only, excluding no-shows.
attended_utilization by class	Removed/deprecated	none	You decided utilization should be aggregate only, not class-specific.
empty_slots	Removed	none	You decided this was not useful for final reporting.
empty_slot_rate	Removed	none	Same reason as above.
percent_served	Unchanged	percent_served	Class-level served / arrivals.
overall_percent_served	Unchanged	overall_percent_served	Aggregate served / aggregate arrivals.
served_slots	Still valid	served_slots	Slots that became completed visits.
no_show_slots	Still valid	no_show_slots	Booked slots lost to no-shows.
booked_slots	Still valid, but diagnostic	booked_slots	Slots that were booked, including no-shows.
